

DRAWER MANAGEMENT ACCESSORIES

Hotel Pan Racks

Hotel Pan Racks (Code: HP) help chefs arrange and store ingredients to suit operational and menu requirements

The Hotel Pan Rack occupies half the drawer area - adequate for most organisational needs - leaving space in the other side of the drawer to store additional items

Hotel Pans are not included with orders for Hotel Pan Racks, but on request, stainless steel, polycarbonate or polypropylene Hotel Pans can be supplied - Price on Application

Hotel Pan Storage

Adande Drawers cater for all sizes of Hotel Pan. When storing different foods in smaller Hotel Pans we recommend holding back-up stock of each food type in the same size pan, stacked one on top of the other, as illustrated in the main photo above. Alternatively, use deeper Hotel Pans (8" max depth) fitted side by side, as in the smaller photo

Adande Drawers hold a deceptively large volume of product because, unlike conventional cabinets, air gaps are not needed between the items. As a result there is no food waste due to 'hot spots' in Adande Drawers

Drawer Dividers

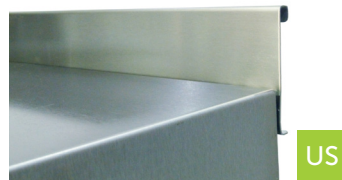

Drawer Dividers (Code: DD) slot into the grooves in the plastic insulated drawer container. Dividers can be moved easily to compartmentalise the drawer for more efficient use

Drawer Dividers can be supplied with new drawer units or ordered separately at a later date

Drawer Container

White Plastic Insulated Food Containers (Code: DT & DM) to suit all Drawer sizes, are available, on request

Adande Drawer Containers are designed to accommodate all Hotel Pan sizes. For more information please refer to the Hotel Pan Storage note on this page

Worktop Upstands

3 inch high stainless steel Upstands (Code: US) can be fixed to the back of all Solid Worktops and Heat Shield tops, other than Matchbox (VCM) Worktops

Longer (2-3 inch high) Upstands (Code: EUS) can be fitted to any unit with Extended Heat Shield or Solid Worktops, except VCM Matchbox Drawers

Pacojet® Beaker Rack

Ingredients stored in Pacojet® Beakers should be held at -20°C

One Pacojet Beaker Rack (Code: PR) holds up to 12 Beakers (illustrated above) covering 60% of the area of the insulated drawer container.

Two Pacojet Beaker Racks (pictured above) side by side, provide storage for up to 20 Beakers
